Attention: Muammar Hermanstyne

Phase I Environmental Site Assessment
1601 E Yesler Way Site
Seattle, Washington
Project: Africatown-1-01

NV5 is pleased to submit this Phase I ESA of the 1601 E Yesler Way site located at 1601 East Yesler Way in Seattle, Washington. Our services were performed in conformance with the standards and practices for all appropriate inquiries specified in Title 40, Chapter I of CFR Part 312 and ASTM E1527-13. Contractual terms for our services are contained in our proposal dated June 7, 2021

We appreciate the opportunity to be of service to Africatown Community Land Trust. Please contact us if you have questions regarding this report.

Sincerely,

NV5

Colby R. Hunt, C.H.M.M.
Principal

EXECUTIVE SUMMARY

NV5 performed a Phase I ESA of the 1601 E Yesler Way site in Seattle, Washington (project site). The Phase I ESA was conducted in conformance with the standards and practices for all appropriate inquiries specified in Title 40, Chapter I of CFR Part 312 and ASTM E1527-13. Contractual terms for our services are contained in our proposal to Africatown Community Land Trust dated June 7, 2021. Any exceptions to or deletions from this practice are described in Sections 3.0 and 13.0. Please note that this section provides a summary of the findings of the Phase I ESA and some details were not included or fully developed. Therefore, this report must be read in its entirety for a more complete understanding of the findings, conclusions, and recommendations contained herein.

Acronyms and abbreviations used herein are defined immediately following the Table of Contents.

PROJECT SITE AND VICINITY DESCRIPTION

Size	1.41 acres
Tax Lot	9826700565
Tax Map	King County – NW 4-24-04
Current Use	Unoccupied
Significant Features	Three-story, vacant senior assisted living facility with three hydraulic elevators and a diesel back-up generator
Vicinity Use	Residential, commercial, and institutional

ENVIRONMENTAL RECORDS REVIEW

Federal, tribal, state, and local environmental records and databases were compiled for the project site and facilities that currently or previously have occupied properties within the specified search distance from the project site. Information contained in the records and databases was reviewed by NV5 to evaluate the potential for environmental impacts to the project site.

Project Site

The project site was not identified on the environmental records and databases reviewed.

Surrounding Sites

The EDR Radius Map Report identified 246 surrounding sites listed on one or more regulatory databases within the ASTM search distances. Based on local topography, the inferred direction of shallow groundwater flow, the regulatory status of the listed sites, the media impacted at the listed sites, and information contained in the regulatory databases, it is our professional opinion that none of the 246 surrounding sites represent a REC at the project site.

HISTORICAL USES – PROJECT SITE AND ADJOINING PROPERTIES

Our review of historical sources from 1893 through the present indicated that the project site was developed for residential use between at least 1893 and 1916 and for a mix of residential and commercial uses between 1916 and 1986. The existing project site structure was constructed in 1987. The project site was used as a senior assisted living facility between sometime in 1987 and sometime in 2019. The structure has been unoccupied since its last use as a senior assisted living facility.

Our review of historical sources from 1893 through the present indicated the adjoining properties north, west, and east of the project site were vacant or developed for residential purposes between 1983 and the early 1900s. By 1916 commercial and institutional developments (churches, a Buddhist temple, the Langston Hughes Performing Arts Institute, and a park) were present on adjoining properties. Mixed residential, commercial, and institutional uses have continued through the present.

SITE RECONNAISSANCE

Based on the site reconnaissance, RECs were not identified in conjunction with the current use of the project site.

CONCLUSIONS AND RECOMMENDATIONS

NV5 performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13, all appropriate inquiries specified in 40 CFR Part 312, and the proposal to Africatown Community Land Trust dated June 7, 2021 for the project site located at 1601 East Yesler Way in Seattle, Washington. Any exceptions to or deletions from this practice are described in Sections 3.0 and 13.0. In our opinion, this assessment has revealed no evidence of RECs, HRECs, or CRECs in connection with the project site.

Although RECs were not observed on the project site, the following BER and environmental concerns were identified during this assessment:

- The presence of chemicals and hazardous substances stored in drums and small-quantity containers does not represent a REC at the project site. The majority of materials observed appeared to be properly stored and evidence of leaks or spills were not observed in the vicinity of these containers. However, these stored substances should be removed from the project site and properly disposed of prior to redevelopment of the project site.
- We did not observe evidence of deleterious materials among the solid waste present throughout the project site. The solid waste should be removed from the project site and transferred to a disposal facility prior to site redevelopment. If hazardous materials are found among the solid waste, they should be separated, characterized, and properly disposed of.
- Evidence of historical heating oil USTs, septic systems/cesspools, and/or water supply wells at the project site was not observed during the course of this assessment. However, based on the historical presence of residences at the project site and the presence of a reported well on an 1893 fire insurance map, it is possible that one or more of these features may be present. If present and encountered in the future, any historical heating oil USTs, septic systems/cesspools, or wells should be decommissioned in accordance with state and local regulations. If evidence of chemical or hazardous material disposal is evident in any encountered septic systems, soil samples should be collected from beneath the septic systems.

- This scope of services did not include the completion of surveys for lead-based paint, asbestos-containing materials, universal waste, or other hazardous building materials in the project site structure. Prior to potential site redevelopment or remodeling, the project site structure should be surveyed for hazardous building materials. If hazardous building materials are present, they should be removed and disposed of in accordance with federal, state, and local regulations prior to site demolition or renovation.

1.0 INTRODUCTION

This report summarizes the results of a Phase I ESA of the 1601 E Yesler Way site in Seattle, Washington (project site). The project site includes Parcel Number 9826700565 of King County Tax Map NW 4-24-04 and consists of 1.41 acres currently developed with a 70,440-square-foot, three-story, vacant senior assisted living facility and associated paved parking and landscaped areas. The project site is shown relative to surrounding physical features on Figure 1. The project site layout and surrounding properties are shown on Figure 2. NV5's firm profile and resumes of project personnel are presented in Appendix A. Acronyms and abbreviations used herein are defined above, immediately following the Table of Contents.

Phase I ESAs have a limited viability as specified in Section 4.6 "Continued Viability of the Site Assessment" of ASTM E1527-13. According to ASTM E1527-13, a Phase I ESA is valid for a period of 180 days from the date of the first data collected for the assessment. The Phase I ESA viability can be extended by 180 days by updating the assessment within one year of the initial assessment. If more than one year passes, a new Phase I ESA will need to be completed in order to qualify for Landowner Liability Protections under CERCLA. **On the basis of the first data collected (June 11, 2021), this Phase I ESA report is considered valid through December 8, 2021.**

2.0 PURPOSE

2.1 PROTECTION FROM CERCLA LIABILITY

One purpose for conducting a Phase I ESA is to undertake all appropriate inquiries into prior ownership and uses of a property so that a prospective purchaser may potentially claim protection from CERCLA and/or state liability as an innocent landowner, a bona fide prospective purchaser, or a contiguous property owner. The standards and practices for all appropriate inquiries are specified in Title 40, Chapter I of CFR Part 312. The inquiry must be conducted by an environmental professional to identify conditions indicative of releases and threatened releases of hazardous substances as defined in CERCLA Section 101(22). If the prospective purchaser is the recipient of an EPA Brownfields grant, the inquiry must also identify conditions indicative of releases and threatened releases of petroleum and petroleum products and controlled substances as defined in 21 U.S. Code 802. These standards and practices do not require the identification of quantities of hazardous substances, petroleum and petroleum products, and controlled substances that, because of said quantity, generally would not pose a threat to human health or the environment.

2.2 IDENTIFICATION OF RECOGNIZED ENVIRONMENTAL CONDITIONS

Another purpose for conducting a Phase I ESA is to identify RECs in connection with a property as they pertain to ASTM E1527-13. This practice is intended for use by parties who wish to assess the environmental condition of a property by taking into account commonly known and reasonably ascertainable information. Although conformance with ASTM E1527-13 constitutes all appropriate inquiry as described in Section 2.1, the standard is intended primarily as an approach to identify RECs in connection with a property. A REC is defined by the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. RECs do not include de minimis conditions that do not generally present a risk to public health or the environment and would not be the subject of legal enforcement if brought to the attention of appropriate governmental agencies.

A CREC is defined by ASTM E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. Examples of required controls include property use restrictions, AULs, institutional controls, and engineering controls. A condition considered by the environmental professional to be a CREC is considered a REC.

An HREC is defined by ASTM E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls such as property use restrictions, AULs, institutional controls, and engineering controls. An HREC is not considered a REC. Before calling the past release an HREC, the environmental professional must determine whether the past release is a REC at the time the Phase I ESA is conducted (for example, if there has been a change in regulatory criteria). If the environmental professional considers the past release to be a REC, such as not meeting regulatory standards for unrestricted use in place at the time the Phase I ESA is conducted, the condition shall be considered a REC.

A BER is defined as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, but not necessarily limited to those environmental issues required to be investigated in this practice.

3.0 SCOPE OF SERVICES

The scope of services performed for this project was conducted in conformance with the standards and practices for all appropriate inquiries specified in 40 CFR Part 312 and the scope and limitations of ASTM E1527-13. The specific scope of services performed included the following:

- Reviewed a current USGS topographic map to identify the physical setting of the project site.
- Reviewed federal, tribal, state, and local environmental records for listings of known or suspected environmental conditions at the project site or nearby properties as specified in 40 CFR Part 312 and ASTM E1527-13.
- Reviewed reasonably ascertainable standard historical sources, including aerial photographs, USGS topographic maps, reverse city directories, fire insurance maps, online property information (including available building department records, property tax information, and zoning/land use records), and other historical sources, as appropriate, to identify development history on and adjacent to the project site relative to the possible use, generation, storage, release, or disposal of hazardous substances.

- Interviewed a representative of the owner and a local government official regarding their knowledge of the project site.
- Conducted a visual reconnaissance of the project site and adjacent properties to obtain information indicating the likelihood of identifying RECs concerning the properties.
- Prepared this report that presents our findings and provides conclusions and recommendations.

The scope of services was limited to only the items listed above. This project did not include completion of an environmental compliance audit; an evaluation for the presence of PCBs in light ballasts; a survey for asbestos, lead-based paint, radon gas, toxic mold, biological pollutants, or urea-formaldehyde insulation; or a wetlands determination or delineation.

4.0 PROJECT SITE AND VICINITY DESCRIPTION

Information concerning the physical setting of the project site and vicinity is based on a review of the USGS 7.5-minute Seattle South, Washington, topographic quadrangle map; information provided by EDR of Shelton, Connecticut; and observations made during a site reconnaissance conducted on June 18, 2021.

The project site encompasses 1.41 acres at 1601 East Yesler Way in Seattle, Washington. The project site is currently owned by Yesler Way QOZB LLC and developed with a 70,440-square-foot, three-story, vacant senior assisted living facility and associated paved parking and landscaped areas. The project site includes King County Parcel Number 9826700565 in the northwest quarter of Section 4, Township 24 North, Range 4 East of the Willamette Meridian.

The project site is situated at an elevation of approximately 270 feet above MSL. The topography of the project site is generally level, sloping slightly downward to the southwest. Based on a review of USGS data and topographic maps for the area, shallow groundwater beneath the project site is expected to be present at a depth of approximately 40 feet BGS and is anticipated to flow to the west toward Puget Sound.

Land use in the vicinity of the project site is primarily residential, commercial, and institutional. According to the City of Seattle and the King County Planning Department, the project site is zoned Neighborhood Commercial [NC1-55 (M)]. Properties surrounding the project site are zoned Neighborhood Commercial [NC1-55 (M)] and Low Rise Multifamily [LR3 (M)].

5.0 USER-PROVIDED INFORMATION

The purpose of this section is to describe information provided by the user of this report (Africatown Community Land Trust) that was considered in the evaluation of potential RECs in connection with the project site.

Muammar Hermanstyne with Africatown Community Land Trust was provided a Phase I ESA User Questionnaire to complete regarding the project site on June 7 and 22, 2021. As of the date of this report, NV5 has not received a completed Phase I ESA User Questionnaire.

6.0 PREVIOUS REPORTS

NV5 did not receive any previous reports for review during the preparation of this Phase I ESA.

7.0 ENVIRONMENTAL RECORDS REVIEW

Federal, tribal, state, and local environmental records and databases were compiled according to 40 CFR Part 312 and ASTM E1527-13 for the project site and those facilities that currently or previously have occupied properties within the specified search distance from the project site. Information contained in the records and databases was reviewed by NV5 to evaluate the potential for environmental impacts to the project site. Local environmental records were also requested from the City of Seattle Fire Marshal's office. The EDR Radius Map Report is presented in Appendix B.

7.1 PROJECT SITE

The project site was not listed on any of the government records or databases searched by EDR.

7.2 SURROUNDING SITES

The EDR Radius Map Report identified 246 surrounding sites listed on one or more regulatory databases within the ASTM search distances. Based on changes in ownership, address, multiple regulatory listings, and multiple regulatory actions, two or more of the surrounding site listings appear to actually represent only one physical location. Therefore, the number of surrounding sites is likely less than reported by EDR. Based on local topography, the inferred direction of shallow groundwater flow, the regulatory status of the listed sites, the media impacted at the listed sites, and information contained in the regulatory databases, it is our professional opinion that none of the 246 sites represent a REC at the project site. However, due to its close proximity to the project site, one of the listed sites is discussed in the following section.

7.2.1 Lee Poletti/Old Repair Shop

The Lee Poletti/Old Repair Shop site is located at 1622 East Yesler Way in Seattle, approximately 90 feet north of the project site and cross-gradient of the project site relative to the inferred groundwater flow direction. The Lee Poletti/Old Repair Shop site was listed on the Washington State Department of Ecology's (Ecology's) LUST database, UST database, VCP database, and NFA database. The project site is also listed on Ecology's CSCSL database, Ecology's FRS database, and EPA's FRS database as the Lakeshore Investment Corporation/Strickland site.

The Ecology LUST database contains listings of sites with reported leaking UST incidents. According to the information in the EDR Radius Map Report, the Lee Poletti/Old Repair Shop site was listed on the Ecology LUST database (LUST Site I.D. 9679) in July 1990. Ecology's database for LUST Site I.D. 9679 indicates petroleum hydrocarbon-contaminated soil was discovered and reported to Ecology when one 5,000-gallon and two 3,000-gallon gasoline USTs, one 1,000-gallon diesel UST, and one 300-gallon waste oil UST were decommissioned and removed from the site in 1990. Two phases of remedial investigations were conducted at the site in October and December 2012.

In July 2013 the Lee Poletti/Old Repair Shop site was entered into Ecology's VCP (VCP Project I.D. NW2760) and remedial excavation activities were conducted at the site in January 2014. Approximately 260 tons of petroleum-contaminated soil were excavated from the site and transported to Roosevelt Regional Landfill in Klickitat County for disposal. Confirmation soil samples collected from the base and sidewalls of the remedial excavation indicated that petroleum hydrocarbons were not detected. Groundwater was not encountered during the remediation excavations. Ecology issued an Opinion of NFA for the Lee Poletti/Old Repair Shop on March 31, 2014. The Ecology Opinion of NFA indicated that the cleanup actions conducted at the Lee Poletti/Old Repair Shop site constituted a permanent remedial action under MTCA.

The Ecology UST database contains listings of sites with USTs. The Lee Poletti/Old Repair Shop is listed on the Ecology UST database (UST Site I.D. 9331) and is associated with two steel USTs installed at the site in December 1964. The Ecology database indicates that the USTs were closed in place. The date the USTs were closed in place was not listed. It is not known if the two steel USTs reportedly closed in place were removed in 1990.

The Lee Poletti/Old Repair Shop site is also identified on Ecology's CSCSL database, Ecology's FRS database, and EPA's FRS database. These databases are inventory or reference lists and do not imply a release or REC at the project site. Based on the local topography, the inferred direction of shallow groundwater flow, the regulatory status, the media impacted, and/or information contained in the regulatory databases, it is our professional opinion that the Lee Poletti/Old Repair Shop site does not represent a REC at the project site.

7.3 ORPHAN SITES

Due to poor or inadequate address information, EDR was unable to successfully map eight facilities identified on several environmental databases. However, enough information was available to ascertain the general location of these orphan facilities relative to the project site and, in some cases, the status of the investigations concerning these orphan sites. Based on the location of the orphan sites, the inferred direction of shallow groundwater flow, the regulatory status of the listed sites, the media impacted at the listed sites, and information contained in the regulatory databases, it is our professional opinion that these orphan sites do not represent a REC at the project site.

7.4 CITY OF SEATTLE FIRE MARSHAL

City of Seattle Fire Marshal UST records were requested on June 16, 2021 by NV5 personnel. Based on our review, the fire marshal does not have record of USTs, spills, or reports of other hazardous materials on the project site.

8.0 PROJECT SITE HISTORY AND BACKGROUND

Reasonably ascertainable information concerning the history and background of the project site begins in 1893 and includes aerial photographs, USGS topographic maps, reverse city directories, Sanborn fire insurance maps, online property information (including available building department records, property tax information, and zoning/land use records), and personal knowledge of individuals familiar with the project site.

Historical aerial photographs of the project site were obtained from EDR and reviewed by NV5. The scale of the photographs reviewed allowed for the interpretation of general site development/configuration but did not allow for the identification of specific project site features. Aerial photographs were reviewed for the following years: 1936, 1943, 1953, 1956, 1965, 1969, 1977, 1980, 1985, 1990, 2006, 2009, 2013, and 2017. The historical aerial photographs are presented in Appendix C.

Historical topographic maps of the project site were obtained from EDR and reviewed by NV5. Topographic maps were reviewed for the following years: 1894, 1895, 1897, 1908, 1909, 1968, 1973, 1983, and 2014. The historical topographic maps are presented in Appendix C.

Reverse city directories for the project site and adjacent properties were obtained from EDR and reviewed by NV5. Please note that in some locations, particularly in urban areas, addresses for a particular property may change over time. Based on a review of Sanborn fire insurance maps and historical property information, the following addresses historically correspond to the project site:

- 1893 through 1904: 108 Joy Street; 1801, 1803, 1809, 1811, and 1817 Yesler Way
- 1904 through 1916: 108 16th Avenue; 1601, 1603, 1609, 1611, 1617, and 1621 Yesler Way
- 1916 through 1950: 100, 108, 114, 116, and 118 16th Avenue; 1601, 1603, 1609, 1611, 1613, and 1621 Yesler Way
- 1950 through 1969: 1610-10½ and 1612-14 Washington Street; 100, 108, 114, 116, and 118 16th Avenue; 1601, 1603, 1609, 1611, 1613, 1619, 1621, 1623, and 1625 Yesler Way
- 1969 through 1977: 1610-10½ and 1612-14 S Washington Street; 100, 103, 108, 114, 116, and 118 16th Avenue; 1601, 1603, 1609, 1611, 1613, 1619, 1621, 1623, and 1625 E Yesler Way

The city directories were reviewed (if available) at approximately five-year intervals for the years spanning 1920 through 2017. The EDR City Directory Report is presented in Appendix C.

Sanborn fire insurance maps for the project site were obtained from EDR and reviewed by NV5. Sanborn fire insurance maps were reviewed for the following years: 1893, 1904, 1905, 1916, 1949, 1950, and 1969. The Sanborn fire insurance maps are presented in Appendix C.

Online property information for the project site and select adjacent properties was reviewed by NV5. The online property information is presented in Appendix C.

8.1 PROJECT SITE

Based on the review of historical sources cited in Section 8.0, we have identified the following developmental history of the project site:

Year	Observations	Source
1893 through 1943	In 1893 the southern portion of the project site appeared as fields and the northern portion of the project site was developed by several residences and related outbuildings. A well was present in the northwestern portion of the project site in 1893 but appears to have been out of use by 1904. By 1916 residences were constructed in the southwestern portion of the project stie.	• Aerial Photographs • Topographic Maps • Sanborn Fire Insurance Maps
1950 through 1969	By the 1950s the project site was occupied by commercial and residential developments. Commercial uses of the project site during the 1950s through the 1970s included glove manufacturing, a painter's storage building, and a tin shop. The southeastern portion of the project site was developed as a parking area during this time.	• Aerial Photographs • Topographic Map • City Directories • Sanborn Fire Insurance Maps
1973 through present	In the 1970s and 1980s the former residential and commercial structures were razed. By 1987 the project site was developed for use as a senior assisted living facility, use that continued through 2019. The project site structure has reportedly been unoccupied since the senior assisted living facility closed.	• Aerial Photographs • Topographic Maps • City Directories • Online Property Information • Site Reconnaissance

Based on our review of historical sources, it is our opinion that the historical use of the project site does not represent a REC at the project site.

8.2 ADJOINING SITES

Based on the review of historical sources cited in Section 8.0, we have identified the following developmental history of properties adjoining the project site:

Year	Observations	Source
1893 through 1969	By 1893 Yesler Way appeared north of the project site and residences had been constructed on the properties north, east, and west of the project site. The southern adjoining property was vacant fields until 1904 when the Washington Street ROW was constructed with residential development appearing on the southern adjoining block. By 1916 institutional developments, including a synagogue and city park, appeared on the eastern and southwestern adjoining properties, respectively, and additional residences appeared east of the project site. By the 1930s a service station was constructed on the northern adjoining property, occupied by the Lee Poletti/Old Repair Shop among other auto-related tenants.	• Aerial Photographs • Topographic Maps • City Directories • Online Property Information

Year	Observations	Source
1973 through present	By 1977 the property west of the project site was redeveloped for commercial use and the residences north and northwest of the project site were razed, with residential redevelopments appearing on the northern and northwestern properties by 1985. Operations at the former service station north of the project site (the former Lee Poletti/Old Repair Shop) continued through at least 2010. By 2015 the Lee Poletti/Old Repair Shop had been redeveloped for mixed commercial and residential uses. Aside from tenant changes, the properties adjoining the project site have appeared relatively unchanged since 2015.	• Aerial Photographs • Topographic Maps • City Directories • Online Property Information • Site Reconnaissance

Based on our review of historical sources, it is our opinion that the historical use of the adjoining sites does not represent a REC in connection with the project site.

9.0 SITE RECONNAISSANCE

NV5 conducted a reconnaissance of the project site on June 18, 2021. The observations described in this section apply to the project site as it appeared on that day. The site reconnaissance was performed to observe the current condition of the project site and obtain information indicating the likelihood of identifying RECs in connection with the project site. Access to the project site and its structure was limited; the parking garage was locked and inaccessible and we did not have access to the elevator mechanical room. The adjoining properties were also observed from the boundaries of the project site as part of the site reconnaissance. A site plan is presented on Figure 2. Photographs of the project site were taken to document observations made during the site reconnaissance and are presented on Figures 3 and 4.

9.1 GENERAL PROJECT SITE USE

The project site consists of a three-story, vacant former senior assisted living facility with a parking garage and associated paved parking and landscaped areas. The structure was unoccupied with an emergency generator, industrial kitchen, former laundry facility, boiler room, and janitorial/storage areas.

9.2 PROJECT SITE OBSERVATIONS

Features of Concern	Observations
Project Site Structures	See Section 9.2.1
Project Site Drainage	See Section 9.2.2
Potable Water Supply	See Section 9.2.3
Sewage Disposal System	See Section 9.2.4
Roads	See Section 9.2.5
Hazardous Substances and Petroleum Products	See Section 9.2.6
ASTs and/or USTs	See Section 9.2.7
Strong, Pungent, or Noxious Odors	Not observed
Pools of Liquid	Not observed
Drums (5 gallons or larger capacity)	See Section 9.2.8
Unidentified Substance Containers	Not observed
Potential PCB-Containing Equipment	See Section 9.2.9
Pits, Ponds, and Lagoons	Not Observed
Stained Soil or Stained Pavement	Not observed
Stressed Vegetation	Not observed
Solid Waste or Fill Material	See Section 9.2.10
Wastewater	Not observed
Wells	Not observed
Historical Septic Systems/Cesspools	See Section 9.2.11
Heating and Cooling Systems	See Section 9.2.12
Interior Stains or Corrosion	Not observed
Interior Drains or Sumps	See Section 9.2.13

9.2.1 Project Site Structures

The project site structure is a three-story, steel-framed building constructed in 1987 that encompasses 70,440 square feet. The structure has concrete floors and a parking garage.

9.2.2 Project Site Drainage

Surface water at the project site is expected to flow into several catch basins present at the project site and the surrounding ROWs. These catch basins are connected to the City of Seattle storm system. Stormwater that accumulates inside the parking garage is expected to flow into a catch basin that is connected to an oil/water separator. Based on our review of information available from the City of Seattle and King County, the catch basins and oil/water separator appear connected to the City of Seattle's storm sewer system. NV5 personnel did not observe surface water at the project site at the time of our site reconnaissance.

9.2.3 Potable Water Supply

Potable water is supplied to the project site by the City of Seattle.

9.2.4 Sewage Disposal System

Sewage generated at the project site is discharged to the City of Seattle municipal sewer system. Based on information provided by the City of Seattle, municipal sewer service has been available at the project site since 1889. Based on available permits on record with the City of Seattle, the commercial structure was connected to the municipal sewer system in 1987.

9.2.5 Roads

The central portion of the project site is paved with asphalt concrete and used for exterior parking areas. Evidence of leaks or spills was not observed in the parking areas.

9.2.6 Hazardous Substances and Petroleum Products

NV5 observed several small-quantity containers of paints, cleaners, solvents, pesticides, oils, lubricants, and sanitizers in multiple areas of the project site structure. These materials appeared to be properly stored with no evidence of leaks or spills observed.

NV5 observed three hydraulic elevators at the project site structure, each with hydraulic oil reservoirs of less than 100 gallons in capacity. Based on the date of construction for the project site structure, it appears unlikely that hydraulic fluid associated with the elevators would contain PCBs. NV5 did not have access to the elevator mechanical room at the time of the site reconnaissance.

A diesel-powered back-up generator was observed in the parking garage at the project site structure in a locked enclosure. Diesel fuel for the generator is stored in an approximately 80-gallon AST.

9.2.7 ASTS and/or USTs

Except for the hydraulic oil reservoirs and diesel AST discussed in Section 9.2.6, evidence of ASTs or USTs was not observed at the project site.

9.2.8 Drums

We observed several 5-gallon containers of water-based paint at the project site. In addition, we observed three empty plastic drums in the dumpster area. Evidence of leaks or spills was not observed in the vicinity of these containers.

9.2.9 Potential PCB-Containing Equipment

NV5 observed three pole-mounted transformers in the ROWs adjacent to the project site. We did not observe labels identifying potential PCB content on the transformers. All three transformers appeared to be in good condition with no evidence of spills or leaks observed.

9.2.10 Solid Waste or Fill Material

A trash enclosure was observed at the southeastern corner of the project site with several dumpsters. Evidence of spills or improper waste disposal was not observed in the vicinity of the trash enclosure. Electronics waste, including computer monitors, televisions, and electronic light ballasts, were observed in several areas of the project site structure.

9.2.11 Historical Septic Systems/Cesspools

Evidence of historical septic systems or cesspools was not observed during the site reconnaissance. However, it is possible historical cesspools or septic systems associated with former project site structures could be present at the project site.

9.2.12 Heating and Cooling Systems

Common areas of the project site structure are heated and cooled with roof-mounted units fueled by natural gas. Residence rooms are heated by individual room units fueled by natural gas and cooled by wall-mounted, electric-powered air conditioning units.

9.2.13 Interior Drains or Sumps

Floor drains were observed in the boiler room, former laundry room, and kitchen areas of the project site structure. Evidence of improper waste disposal was not observed in the vicinities of these floor drains. According to information obtained from the City of Seattle, the floor drains discharge to the municipal sanitary sewer system.

9.3 SURROUNDING PROPERTY USE

The project site is directly bound to the north by East Yesler Way, across which are residential and commercial properties; to the east by 17th Avenue South, across which is the Langston Hughes Performing Arts Institute; to the south by South Washington Street, across which are residential properties and the Washington Medical Clinic; and to the west by 16th Avenue South, across which are residential properties and Seattle Koyasan Buddhist Temple. Evidence of adverse environmental conditions was not observed on adjacent properties.

10.0 INTERVIEWS

The project site is currently owned by Yesler QOZB LLC and unoccupied. NV5 interview a representative of the owner and a local government official during the course of this assessment. Information obtained from these interviews is presented in the following sections.

10.1 OWNER'S REPRESENTATIVE

Eric Evans (Shelter Holdings) was provided a Property Owner Questionnaire on June 22, 2021 regarding his knowledge of the project site. According to Mr. Evans, the project site historically served as a senior assisted living facility and is serviced by conventional municipal drinking water, sewer, and stormwater services. Mr. Evans noted the presence of floor drains within the project site structure and that they discharge to the municipal sanitary sewer system.

10.2 CURRENT OCCUPANT

The project site is currently unoccupied.

10.3 LOCAL GOVERNMENT OFFICIAL

A representative with the King County Assessor's Office was interviewed on June 23, 2021. Ms. Philip confirmed that the property is currently owned by Yesler QOZB LLC. Ms. Philip was not aware of environmental issues associated with the project site.

11.0 DATA GAPS

The user of this report did not provide NV5 with responses to the User Questionnaire as of the date of this report. However, based on the information collected during this assessment, it is our professional opinion that this data gap is of low significance relative to our ability to identify RECs at the project site.

The parking garage in the northwestern portion of the project site was inaccessible, which prevented observation of the emergency generator and oil/water separator. In addition, NV5 personnel did not have access to the elevator mechanical room. It is our professional opinion that this data gap is of moderate significance relative to our ability to identify RECs at the project site.

NV5 was not able to identify the property use prior to the earliest developed use as residential properties by 1893, which is considered a data gap. However, based on other information collected during this assessment, it is our professional opinion that this data gap is of low significance relative to our ability to identify RECs at the project site.

12.0 DECLARATIONS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the project site. We developed and performed all the appropriate inquiries in accordance with the standards and practices set forth in 40 CFR Part 312.

13.0 LIMITATIONS

This Phase I ESA has been prepared for use by Africatown Community Land Trust. NV5 makes no warranties or guarantees regarding the accuracy or completeness of information provided or compiled by others. The information presented in this report is based on the above-described research and a single recent site visit. Information provided by others was relied on in our description of historical conditions and review of regulatory databases and files. The available data do not provide definitive information with regard to all past uses, operations, or incidents at the project site or adjacent properties. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property. There is always a potential that areas with contamination that were not identified during this assessment exist at the project site or in the study areas. Further evaluation of such potential would require additional research, subsurface exploration, sampling, and/or testing.

Some substances may be present in the project site vicinity in quantities or under conditions that may have led or may lead to contamination of the project site but are not included in current local, state, or federal regulatory definitions of hazardous substances or do not otherwise present current potential liability. NV5 cannot be responsible if the standards of all appropriate inquiry or regulatory definitions of hazardous substance change or if you are required to meet more stringent standards in the future.

This report is not intended for use by others, and the information contained herein is not applicable to other sites. Reliance on this report by other parties is strictly at the risk of those parties, and NV5 will grant no third-party reliance unless specifically requested in writing by our client for whom this report was prepared.

Within the limitations of scope, schedule, and budget, our services have been executed in accordance with the generally accepted environmental science practices for Phase I ESAs in this area at the time this report was prepared. No warranty or other conditions, express or implied, should be understood.

◆ ◆ ◆

We appreciate the opportunity to be of service to Africatown Community Land Trust. Please call if you have questions regarding this report.

Sincerely,

NV5

Tim Hainley

APPENDIX A

NV5

FIRM PROFILE

NV5 offers a wide array of civil engineering related services with over 100 offices nationwide and overseas and more than 4,000 staff. With a year 2020 gross revenue in excess of $600 million, NV5 has a proven ability to help clients plan, design, build, test, and operate projects that improve the communities where we live and work. Locally, the NV5 team provides integrated environmental and geotechnical engineering services from Wilsonville, Oregon; and Vancouver, Longview, Tacoma, and Bothell, Washington. Locally, the NV5 team (formerly GeoDesign) has more than 60 engineers, geologists, environmental scientists, engineering geologists, hydrogeologists, technical personnel, and support staff.

From planning and design through construction, we offer consulting services in support of commercial and residential developments, industrial facilities, property transactions, regulatory compliance, and transportation and water infrastructure systems. NV5 works on all phases of project development, including preliminary studies for due diligence, master planning studies, siting of new structures and utility and road alignments, regulatory studies (such as NEPA documents), comprehensive investigations for final geotechnical design, oversight of environmental clean-up activities, and construction observation and testing.

NV5

COLBY R. HUNT, CHMM

Principal

Colby Hunt has over 25 years of experience conducting various environmental and hazardous materials assessments, including Phase I and II ESAs, HMAs, RI/FSs, land and water use determinations, risk-based analyses, groundwater monitoring, and remediation projects. He has a BS in Environmental Health and Safety, is an AHERA Building Inspector and Management Planner, and is a Certified Hazardous Materials Manager (CHMM). Colby has successfully managed projects involving hazardous materials surveys and asbestos abatement projects at remote facilities throughout Oregon and Washington, as well as numerous asbestos and lead-based paint assessments for residential, commercial, and industrial facilities.

Key Projects

- Bellevue School District, Commercial Properties, Bellevue, WA
- Bellevue Towers; Bellevue, WA
- Bridge Housing Corporation, The Abigail, Portland, OR

HAZWOPER Training and Annual Updates
AHERA Building Inspector and Management Planner
Institute of Hazardous Material Management Certified Hazardous Materials Manager (Senior Level)
Respirator Fit Test Certification

KYLE R. SATTLER, LG

Associate Geologist

Kyle Sattler has over 29 years of experience in a wide range of environmental, hydrogeologic, and geotechnical projects for private and public sector clients. His experience includes the investigation, evaluation, risk assessment, and remediation of numerous sites that have had impacted soil, sediment, groundwater, and surface water.

Kyle has extensive experience managing projects conducted under the Washington Department of Ecology's and Oregon Department of Environmental Quality's Voluntary Cleanup Programs. Project sites have included vacant lots, commercial properties, and highly industrialized facilities, as well as transportation corridors. Environmental tasks on transportation projects have ranged from simple re-pavement projects along specified roadway alignments to more complex projects involving reconstruction, road widening, utility improvements, and realignment. Many of Kyle's projects have involved implementing various types of soil remediation and groundwater treatment, and the application of risk-based protocols for site closure. Kyle was with NV5 from 2005 to 2009, and rejoined the firm in June 2017.

Key Projects

- Parr Lumber, Columbia East Business Park; Pasco, WA
- Former Summers Lane Service Station; Klamath Falls, OR
- Ross Island Sand & Gravel, Feasibility Study/Reclamation Support Services; Portland, OR
- Potlatch Corporation, Hydraulic Connection Study; Lewiston, ID
- Washington County Facilities Management, Former Shadybrook Landfill; North Plains, OR
- Vancouver Clinic at Columbia Tech Center; Vancouver, WA
- Canyon Clock Center; Frederickson, WA
- 85-Acre Clackamas Quarry Site; Clackamas, OR
- Bridgeport Village; Tigard/Tualatin, OR
- Burlington Northern and Santa Fe Railway; Vancouver, WA, and Klamath Falls, OR
- Bellevue Towers; Bellevue, WA
- City of Battle Ground, Public Works Operations Center; Battle Ground, WA
- Bellevue School District, Ardmore Elementary School; Bellevue, WA
- Proposed The Landing at Evergreen (former Evergreen Airport – 52-acre site); Vancouver, WA
- Turnbull Landfill; Vancouver, WA

** Experience outside of NV5*

Credentials/Certifications

BA, Geology, Whitman College, 1989
Licensed Geologist, WA
OSHA Hazardous Materials Training (40-Hour and 8-Hour Refresher)
Certified First Aid/CPR

TIM HAINLEY

Environmental Staff

Tim Hainley joined NV5 in March 2016 as a part of our geotechnical field staff, and became a part of the firm's environmental group in November 2017. For NV5's environmental team, Tim is assisting with Phase I and II Environmental Site Assessments, environmental drilling, and hazardous building materials surveys. Tim's geotechnical responsibilities included construction observation and documentation of site grading; sub-grade evaluation of footings and foundations; placement and compaction of fill, baserock, and asphalt concrete using a portable nuclear gauge; and the installation and testing of deep foundations and shoring systems.

Prior to joining NV5, Tim served nearly two years in the United States Peace Corps in Malawi, Africa. While at Notre Dame, he served as an undergraduate research assistant in the University's Experimental Geochemistry and Geomicrobiology Laboratory.

Key Projects

- Project Piper (Amazon Distribution Center); Troutdale, OR
- Proposed Lot 5 Pearl District Development; Portland, OR
- Sunlight Centennial Development; Vancouver, WA
- City of Vancouver, Replacement Fire Stations Nos. 1 & 2; Vancouver, WA
- City of Portland, Cully Park; Portland, OR
- Proposed Mixed-Use Development (NW 19th and Quimby); Portland, OR
- Touchmark Heights Development; Portland, OR
- Towne Storage Building; Portland, OR
- Reynolds School District, Fairview Elementary School; Fairview, OR
- Reynolds School District, Reynolds High School; Troutdale, OR
- 17th and Front Development; Portland, OR
- Portland Public Schools, Faubion PK-8 School; Portland, OR
- Bethany Creek Falls Development; Bethany, OR
- Portland Community College Sylvania Campus; CC Building, East Entry; Portland, OR
- Multnomah County, Multnomah County Courthouse; Portland, OR
- Harbor Sky Apartments, Lots 2 and 5; Portland, OR
- Hockinson School District, Hockinson High School; Brush Prairie, WA
- Vancouver-Williams Apartments; Portland, OR
- Cedar Hills Crossing Improvements; Beaverton, OR

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/24/2021 has revealed that there are 27 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 01/12/2021 has revealed that there are 92 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology’s Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 02/09/2021 has revealed that there are 12 WA UST sites within approximately 0.25 miles of the target property.

WA PTAP: A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

A review of the WA PTAP list, as provided by EDR, and dated 02/09/2021 has revealed that there are 3 WA PTAP sites within approximately 0.5 miles of the target property.

State and tribal Brownfields sites

WA BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the WA BROWNFIELDS list, as provided by EDR, and dated 01/12/2021 has revealed that there is 1 WA BROWNFIELDS site within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 01/12/2021 has revealed that there are 17 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

WA AQUEOUS FOAM: Aqueous film-forming foam-laced water running off from fuel spills, firefighting events and routine training sessions has put those chemicals in ground water, surface water, sediments, biota, and other natural resources of the state.

A review of the WA AQUEOUS FOAM list, as provided by EDR, and dated 12/31/2020 has revealed that there is 1 WA AQUEOUS FOAM site within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SEATTLE CITY LIGHT	361 4TH AVE S	W 1/2 - 1 (0.830 mi.)	215	2310

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D003
Waste Description:	REACTIVE WASTE
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

LC JERGENS PAINTING CO (Continued) **1004794972**

events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

UNOCAL 5473 (Continued) **1000660467**

Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

US BROWNFIELDS:

Name:	FORMER NU WAY CLEANERS
Address:	113 12TH AVENUE
City,State,Zip:	SEATTLE, WA 98122
Recipient Name:	Seattle Housing Authority
Grant Type:	Cleanup
Property Number:	9826700295
Parcel size:	.16
Latitude:	47.602154
Longitude:	-122.31719699999996
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	The Seattle Housing Authority is undertaking a major redevelopment along this section of 12th Avenue in Seattle’s Central District. To this end SHA acquired parcels to the south of this site which were assessed and found to be contaminated with petroleum and solvent in part derived from the former Nu Way Cleaners site. SHA has received an EPA Brownfields Cleanup Grant for the "downgradient" southern parcels, but is in need of assessment assistance from the King County/City of Seattle Brownfields program to characterize the suspected "source" area to the north. PPF attached to QR 2 revised, 1/1/06-3/31/06 A Phase II Environmental Site Assessment was completed in September 2006 by driling seven soil borings on the subject property and two on the adjacent property. The investigation identified gasoline-range hydrocarbons indicative of mineral spirits and the dry cleaning solvent tetrachloroethene at concentrations exceeding state cleanup standards in both soil and groundwater. A preliminary cleanup cost estimate suggests that up to 3700 tons of soil might have to be removed to achieve Method A cleanup standards. PPF - Former Nu Way Cleaners/SHA 12th Avenue site, 4-30-07. Project included abatement, demolition, & disposal of all improvements, site grading, and removal of USTs. Groundwater monitoring wells have been installed and are being monitored PPF- Former Nu Way Cleaners I, 8/31/09. Former Use: A 2,200 square foot single story building was constructed on the site in 1931. The structure was steam heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by EA Crane who ran a

FORMER NU WAY CLEANERS (Continued) **1012174216**

dry cleaning business called Crane’s Cleaners. By the 1960s it was called Nu Way Cleaners. The name may have been changed to Dick’s Central Cleaners in the 1980s but the city directory shows the address of Dick’s Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry cleaning fluids like Stoddard solvents and perc as well as boiler fuel. Vacant parcel formerly occupied by Nu Way Cleaners. Single story 2,200 sqaure feet masonary building reportedly heated by steam with no information regarding USTs.

Highlights:	The Seattle Housing Authority is undertaking a major redevelopment along this section of 12th Avenue in Seattle’s Central District. To this end SHA acquired parcels to the south of this site which were assessed and found to be contaminated with petroleum and solvent in

FORMER NU WAY CLEANERS (Continued) **1012174216**

part derived from the former Nu Way Cleaners site. SHA has received an EPA Brownfields Cleanup Grant for the "downgradient" southern parcels, but is in need of assessment assistance from the King County/City of Seattle Brownfields program to characterize the suspected "source" area to the north. PPF attached to QR 2 revised, 1/1/06-3/31/06 A Phase II Environmental Site Assessment was completed in September 2006 by driling seven soil borings on the subject property and two on the adjacent property. The investigation identified gasoline-range hydrocarbons indicative of mineral spirits and the dry cleaning solvent tetrachloroethene at concentrations exceeding state cleanup standards in both soil and groundwater. A preliminary cleanup cost estimate suggests that up to 3700 tons of soil might have to be removed to achieve Method A cleanup standards. PPF - Former Nu Way Cleaners/SHA 12th Avenue site, 4-30-07. Project included abatement, demolition, & disposal of all improvements, site grading, and removal of USTs. Groundwater monitoring wells have been installed and are being monitored PPF- Former Nu Way Cleaners I, 8/31/09. Former Use: A 2,200 square foot single story building was constructed on the site in 1931. The structure was steam heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by EA Crane who ran a dry cleaning business called Crane's Cleaners. By the 1960s it was called Nu Way Cleaners. The name may have been changed to Dick's Central Cleaners in the 1980s but the city directory shows the address of Dick's Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry cleaning fluids like Stoddard solvents and perc as well as boiler fuel. Vacant parcel formerly occupied by Nu Way Cleaners. Single story 2,200 sqaure feet masonary building reportedly heated by steam with no information regarding USTs.

Property Description:	A 2,200 square foot single story building was constructed on the site in 1931. The structure was steam heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by EA Crane who ran a dry cleaning business called Crane’s Cleaners. By the 1960s it was called Nu Way Cleaners. The name may have been changed to Dick’s Central Cleaners in the 1980s but the city directory shows the address of Dick’s Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry cleaning fluids like Stoddard solvents and perc as well as boiler fuel. Vacant parcel formerly occupied by Nu Way Cleaners. Single story 2,200 sqaure feet masonary building reportedly heated by steam with no information regarding

Highlights:	The Seattle Housing Authority is undertaking a major redevelopment along this section of 12th Avenue in Seattle’s Central District. To this end SHA acquired parcels to the south of this site which were assessed and found to be contaminated with petroleum and solvent in part derived from the former Nu Way Cleaners site. SHA has received an EPA Brownfields Cleanup Grant for the "downgradient" southern parcels, but is in need of assessment assistance from the King County/City of Seattle Brownfields program to characterize the suspected "source" area to the north. PPF attached to QR 2 revised, 1/1/06-3/31/06 A Phase II Environmental Site Assessment was completed in September 2006 by driling seven soil borings on the subject property and two on the adjacent property. The investigation identified gasoline-range hydrocarbons indicative of mineral spirits and the dry cleaning solvent tetrachloroethene at concentrations exceeding state cleanup standards in both soil and groundwater. A preliminary cleanup cost estimate suggests that up to 3700 tons of soil might have to be removed to achieve Method A cleanup standards. PPF - Former Nu Way Cleaners/SHA 12th Avenue site, 4-30-07. Project included abatement, demolition, & disposal of all improvements, site grading, and removal of USTs. Groundwater monitoring wells have been installed and are being monitored PPF- Former Nu Way Cleaners I, 8/31/09. Former Use: A 2,200 square foot single story building was constructed on the site in 1931. The structure was steam heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by EA Crane who ran a dry cleaning business called Crane’s Cleaners. By the 1960s it was called Nu Way Cleaners. FORMER NU WAY CLEANERS (Continued) **1012174216**

address of Dick's Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry cleaning fluids like Stoddard solvents and perc as well as boiler fuel. Vacant parcel formerly occupied by Nu Way Cleaners. Single story 2,200 sqaure feet masonary building reportedly heated by steam with no information regarding USTs.

Property Description: A 2,200 square foot single story building was constructed on the site in 1931. The structure was steam heated by an oil-fired burner whose fuel was stored in a UST at the western end of the building. The original building was owned by EA Crane who ran a dry cleaning business called Crane's Cleaners. By the 1960s it was called Nu Way Cleaners. The name may have been changed to Dick's Central Cleaners in the 1980s but the city directory shows the address of Dick's Cleaners as 115 - 12th Ave. None of these names show up in city directories after 1994. Huberta M. Brown acquired the site by 1993 and transferred it to the Huberta M. Brown Family Limited Partnership in January 1997. From the property next door, three vent pipes for USTs can be observed in back of the building. In addition, a 4 inch vent can ben seen near the northwest corner of the building. It is assumed that these vents are connected to USTs that stored dry cleaning fluids like Stoddard solvents and perc as well as boiler fuel. Vacant parcel formerly occupied by Nu Way Cleaners. US BROWNFIELDS:

Name:	FORMER LLOYD’S ROCKET GAS STATION
Address:	110 BOREN AVENUE
City,State,Zip:	SEATTLE, WA 98144
Recipient Name:	King County Department of Natural Resources and Parks
Grant Type:	Assessment
Property Number:	9826700365
Parcel size:	.33
Latitude:	47.6015
Longitude:	-122.3171
HCM Label:	Interpolation-Map
Map Scale:	1:1000
Point of Reference:	Center of a Facility or Station
Highlights:	Property was an important business in Seattle’s Central District until Mr. Lloyd died and the property fell into disrepair and was abandoned. Reconstruction of the property as a restaurant is considered a major improvement eagerly awaited by the community. The city has placed high priority on lending assistance to a new owner/developer. FINDS:

Registry ID: 110005313179

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MARPAC CONSTRUCTION LLC (Continued) **1001491116**

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ART PROCESS INC (Continued) **1000128820**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

SEATTLE VOCATIONAL INSTITUTE (Continued) **1004795064**

corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Description:	BENZENE
Waste Code:	D024
Waste Description:	M-CRESOL
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

SWEDISH MEDICAL CENTER PROVIDENCE (Continued) **1000811027**

	NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	P012
Waste Description:	ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE
Waste Code:	U002
Waste Description:	2-PROPANONE (I) (OR) ACETONE (I)
Waste Code:	U010
Waste Description:	AZIRINO [2’,3’:3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C
Waste Code:	U058
Waste Description:	2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE
Waste Code:	U059
Waste Description:	5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN
Waste Code:	U115
Waste Description:	ETHYLENE OXIDE (I,T) (OR) OXIRANE (I,T)
Waste Code:	U150
Waste Description:	L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN
Waste Code:	U206
Waste Description:	D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

12TH AND JEFFERSON (Continued) **1016354711**

Highlights:	Property is in the process of being redeveloped into mixed-use commercial space and affordable housing. Redevelopment estimated to be completed at the end of 2012. Former Use: Based upon historic research of city directories and tax records, the site at 1200-06 East Jefferson was residential until 1926 when a one-story gasoline station with a concrete floor and grease pit was built at the northeast corner of 12th Avenue and East Jefferson Street. The address was 500 12th Avenue. The gas station passed through a number of private owners until the 1950s when it became primarily an auto repair facility. In the 1960s and 1970s it was used as a trailer rental office. Sometime after the early 1970s, this parcel was acquired by Seattle University for a parking lot. Seattle University sold it to the City of Seattle in 1990. In 1989, a site assessment was conducted that indicated there were underground storage tanks on the property. Available documents indicate these USTs were removed in late 1989 and the tank site was sampled, however the UST Removal Report is currently missing and data from the UST tank sites are not available. It is not known at this time when the buildings were removed. The lot was graveled over and used by Seattle Department of Engineering for a project staging area.

Property Description:	Based upon historic research of city directories and tax records, the site at 1200-06 East Jefferson was residential until 1926 when a one-story gasoline station with a concrete floor and grease pit was built at the northeast corner of 12th Avenue and East Jefferson Street. The address was 500 12th Avenue. The gas station passed through a number of private owners until the 1950s when it became primarily an auto repair facility. In the 1960s and 1970s it was used as a trailer rental office. Sometime after the early 1970s, this parcel was acquired by Seattle University for a parking lot. Seattle University sold it to the City of Seattle in 1990. In 1989, a site assessment was conducted that indicated there were underground storage tanks on the property. Available documents indicate these USTs were removed in late 1989 and the tank site was sampled, however the UST Removal Report is currently missing and data from the UST tank sites are not available. It is not known at this time when the buildings were removed. The lot was graveled over and used by Seattle Department of Engineering for a project staging area.

Property Description:	Based upon historic research of city directories and tax records, the site at 1200-06 East Jefferson was residential until 1926 when a one-story gasoline station with a concrete floor and grease pit was built at the northeast corner of 12th Avenue and East Jefferson Street. The address was 500 12th Avenue. The gas station passed through a number of private owners until the 1950s when it became primarily an auto repair facility. In the 1960s and 1970s it was used as a trailer rental office. Sometime after the early 1970s, this parcel was acquired by Seattle University for a parking lot. Seattle University sold it to the City of Seattle in 1990. In 1989, a site assessment was conducted that indicated there were underground storage tanks on the property. Available documents indicate these USTs were removed in late 1989 and the tank site was sampled, however the UST Removal Report is currently missing and data from the UST tank sites are not available. It is not known at this time when the buildings were removed. The lot was graveled over and used by Seattle Department of Engineering for a project staging area.

Property Description:	Based upon historic research of city directories and tax records, the site at 1200-06 East Jefferson was residential until 1926 when a one-story gasoline station with a concrete floor and grease pit was built at the northeast corner of 12th Avenue and East Jefferson Street. The address was 500 12th Avenue. The gas station passed through a number of private owners until the 1950s when it became primarily an auto repair facility. In the 1960s and 1970s it was used as a trailer rental office. Sometime after the early 1970s, this parcel was acquired by Seattle University for a parking lot. Seattle University sold it to the City of Seattle in 1990. In 1989, a site assessment was conducted that indicated there were underground storage tanks on the property. Available documents indicate these USTs were removed in late 1989 and the tank site was sampled, however the UST Removal Report is currently missing and data from the UST tank sites are not available. It is not known at this time when the buildings were removed. The lot was graveled over and used by Seattle Department of Engineering for a project staging area.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each

COLORGRAPHICS INC (Continued) **1000659124**

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
